seneye HOME

Seneye analyzes your water and contacts you if something is wrong saving your fish from the devastating effects of new tank syndrome (NH3) and harmful swings in pH and temperature. Great for new fish keepers through to experts who just want extra peace of mind. Parameters are recorded and sent to the seneye cloud every 30 minutes which replace the need for constant testing. A seneye can also run offline as a datalogger for 30 days using a power adaptor.

benefits of seneye home

- Saves your investment in fish and coral
- Works day and night to test your water
- SMS and e-mail alerts when things go wrong
- Records 1500 monthly readings of each parameter
- Full history and online graphs
- Aquarium advice and help
- Great technical support team

seneye monitors

- free ammonia (NH3)*
- pH*

seneye SWS

*replaces the need
for a PC or MAC*

Use the seneye web server (SWS) to make any seneye device work more efficiently and effectively. It allows people without a PC to use a seneye. and output the results direct to their phone, tablet, or computer.

There are two SWS versions. Both have an Ethernet port and one also has a Wi-Fi module. When connected to your wireless internet router you will get instant monitoring, not just across your home, but also the world via the seneye cloud.

To use the SWS outdoors, a seneye Dri box is the simplest way to connect up everything next to the pond.

features

- Reliable connection to the seneye cloud
- Computerless operation
- Plug and play
- 4 x expansion ports
- Ethernet and Wi-Fi models

benefits

- Less down time and faster reactions
- Low power consumption
- Simple set up
- Ready for future add-ons
- Wi-Fi modules has 100m range

connects directly to the seneye.me cloud.

Works with all HTML5 enabled web devices.

Package includes:

- seneye web server (SWS)
- power supply
- power cable 1 meter
- ethernet cable 1 meter
- Wi-Fi module (on Wi-Fi model)

seneye SLIDE

monitor free ammonia, the number 1 killer!

- 1500 NH3 readings
 - 1500 pH readings
 - Alerts for NH3 and pH
 - Each slide lasts 30 days
- All other functions work without slide

buy them
at your
local store

there is no subscription and no contract with a seneye.

The disposable seneye+ slide measures pH and NH3 and simply needs replacing each month for accurate and reliable readings. You can simply pay as you use.

seneye

SLIDES (POS PACK)

Seneye analyzes your water every 30 minutes and contacts you if something is wrong. The sensor slide protects your aquarium by monitoring the free ammonia and pH levels. Activating a new seneye slide every 30 days removes the need for time consuming and costly manual testing, along with the need for error-ridden recalibrating. An active slide adds SMS along side the e-mail alerts.

So save your fish from the devastating effects of new tank syndrome, as well as filter crashes and harmful swings in pH for just a few pence per day.

benefits of using a slide

- Saves your investment in fish and coral
- Works day and night to test your water
- SMS when things go wrong
- Records 1500 monthly readings of pH and NH3
- No complex recalibrating
- Aquarium advice and help

seneye slide

- free ammonia (NH3)
- pH
- SMS Alerts

* all other functions work without a slide

Keep an active slide fitted to get SMS alerts.

seneye FLOAT

This seneye float ensures that your seneye device will float in a pond, aquarium or sump, meaning you can look down on the device to see local alert lights. Alternatively, when used in an aquarium, the seneye device can be positioned in the float with the light sensor facing upwards allowing for constant direct light readings to be performed. The seneye float can also be used in an aquarium sump if you don't wish to see the seneye in your top tank.

benefits of using an float

- Works with all seneye devices
- Great for ponds and sumps
- Ideal for direct continuous light readings
- Durable material for long outdoor life

Package includes:

- seneye float
- A6 size POS box

POWER ADAPTOR

*for offline
use only*

This seneye USB Power Adaptor is a compact full power adaptor that offers flexibility for customers who don't wish to have their seneye device constantly connected to a PC. When powered by the USB Power Adaptor readings are stored every hour and warning lights are displayed on the seneye device if the water parameters are toxic. Simply reconnect the seneye device to a PC, with the seneye connect application, and upto 30 days of stored readings are automatically uploaded into the seneye.me dashboard.

*all major plug
types available*

benefits of using a power adaptor

- Works with all seneye devices
- Allows for offline data to be collected.
- Requires no other connector or cable
- Works as a charger for most USB devices

Package includes:

- Power supply 5V / 750ma
- A7 size POS box

seneye CLEANER

This seneye cleaner replenishes an old and tired looking devices to make it look and work like new. It is capable of removing even the hardest coralline algae and the hard mineral cake that can build up on kit. Using seneye cleaner is easy; just empty the non toxic crystals provided into a glass of water and place the device into the mixture. You will instantly see the cleaning power take place. Once cleaning has taken place which will be 1 to 2 hours depending on build up, simply rinse off. Your equipment will be completely sterile; great for moving tanks while preventing transfer of fish disease.

benefits of using a seneye cleaner

- Saves your investment in equipment
- Restores performance
- Non toxic and gentle
- Great for sterilizing equipment
- Simple to use

Package includes:

- Full instructions
- Pair of disposable gloves
- Pot of seneye cleaner
- A7 size POS box

Italian	SEN000275	886455001201

great for all
equipment

seneye

SLIDE SOAKER

The seneye slide soaker aims to make the process of wetting slides faster and more reliable. As with all pH test equipment, there is a wetting stage where air has to be replaced by water in the sensor. Until this has been done the slide will read low and therefore potentially give a false alert. There is also a risk that water removed from the aquarium for soaking may not remain the same as in the tank, again causing the potential for false readings when the slide is first fitted. Using the slide soaker will greatly reduce the chance for error and speed up the entire wetting process.

benefits of using a slide

- Slides wet faster
- Slides show more accurate values straight away
- Fit to the inside of tank via suction cup supplied
- Also floats so ideal for sumps
- Protects slide from light during wetting

Package includes:

- Suction cup
- Slide Soaker
- A7 size POS box

Language	Item code	Barcode

CAR POWER

NH3 is one of the most problematic chemicals when shipping large fish and having to stop every few hours to perform and log manual tests just prolongs travel time. This seneye USB car power adaptor is a way for people to transport fish without having to worry about stopping to test the water. All data is logged internally on the seneye and local warning lights are activated if there is a problem. The adaptor fits neatly in a standard 12v car charging socket. Its also sutible for charging other USB powered devices.

benefits of using car power

- Saves your investment in fish and coral
- Data is logged internally
- Device alerts when things go wrong
- Great for transporting large fish

Package includes:

- 1x car power adaptor
- A7 size POS box

USERS

"Thanks for the quick reply.
Really good customer service
from seneye"

I would not be without my
seneye reef, great product
with a great price

Thank you for excellent information,
Brought on Saturday and installed working
well. Many thanks

"Thanks for the fast
and efficient service!"

James

"fantastic
product"

**"MINE SAVED ME AFTER I FORGOT
TO PLUG MY HEATER BACK IN
AFTER A WATER CHANGE. WASN'T
TILL HOURS LATER IN THE MIDDLE
OF THE NIGHT BUT IT SAVED MY
AR\$. LOVE IT....."**

I love my seneye
reef and its a great prod-
uct!!!

Thanks again for the quick
response. Great product by
the way.

"I feel this Seneye is
one of the best things
to happen to my fish
since water."

Carmine

now i just need other big players in the
marine world to listen to what us as
consumers say.

"This is a great monitor that
will probably be in most
peoples equipment lists soon"

...want to keep a close eye on my parameters I feel the price is worth paying.

I have found the seneye to be more accurate than my test kit... I am inclined to believe my
seneye device over the liquid kit. It also shows my feeding cycle as it picks up the ammo-
nia spikes.

I am a sucker for gadgets and details so that is why I got my seneye.

If you decide to take the plunge I doubt you will be disappointed with the product and it's
detail.
