BASINS AT THEIR BEST

YOUR IDEAS BECOME REALITY WITH SCHURAN.

We are in the business of building first-rate, customized aquariums out of thermo-plastics. For the past 30 years, prominent zoos, aqua zoos, scientific institutes, hotels, restaurants, commercial enterprises and home owners with special requirements have profited from our company's plastics expertise all over the world.

Schuran builds customized aquariums in all sizes for all requirements. Working in close cooperation with engineers, marine biologists and zoo keepers we provide quality products that satisfy all needs and standards.

Rectangular and round basins, race-way basins, individually designed show equipment of all dimensions or highly sophisticated jellyfish swirl tanks, holding and water treatment equipment - we are the specialists to do the job for you.

THE PLASTICS PROFESSIONALS 14

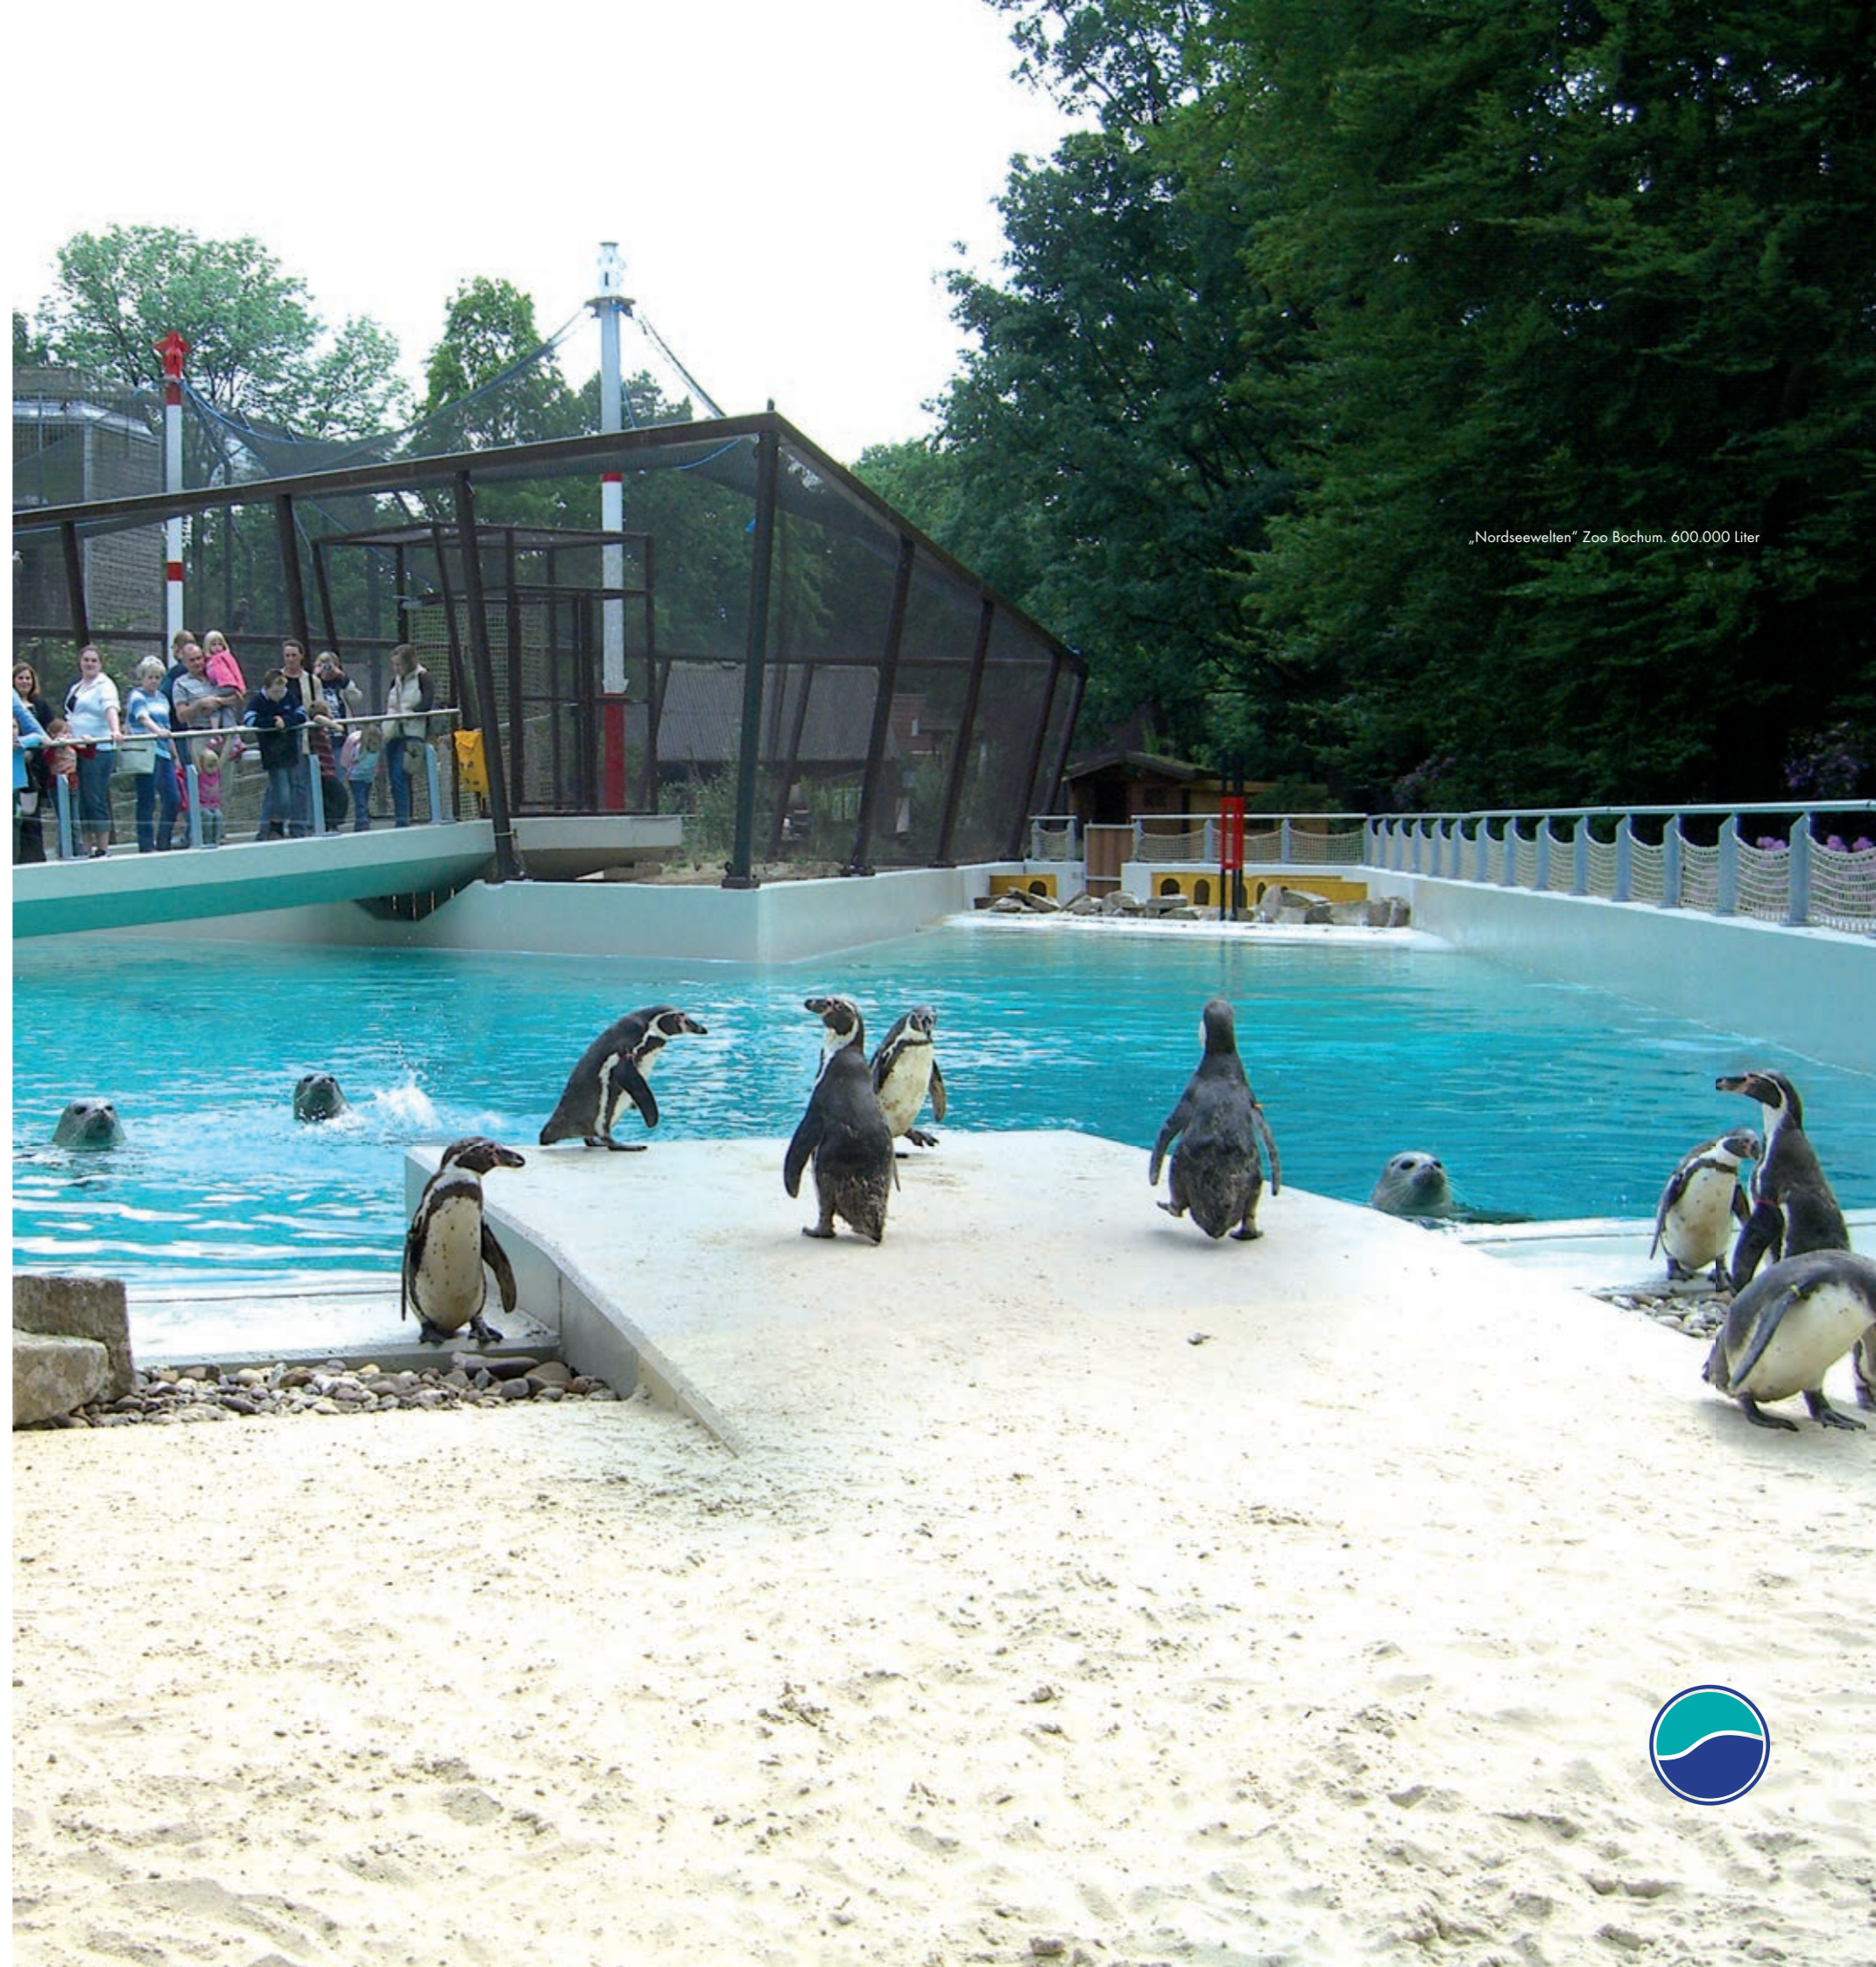

FASCINATING WATER WORLDS

FOR AQUA ZOOS, ZOOLOGICAL GARDENS
AND SCIENTIFIC INSTITUTES.

Whether for penguins, polar bears, sea lions, crocodiles or other exotic species – we know exactly what we are doing when it comes to the special demands made of basins and filter technology. Working with you, Schuran designs aquariums which make the animals feel at home and provide visitors with an enjoyable experience. The size, the shape and the technology to retain optimal water quality are ideal, as are conditions for control, maintenance and care.

Zoo at sea Bremerhaven. 1 Mio. Liter

„Nordseewelten“ Zoo Bochum. 600.000 Liter

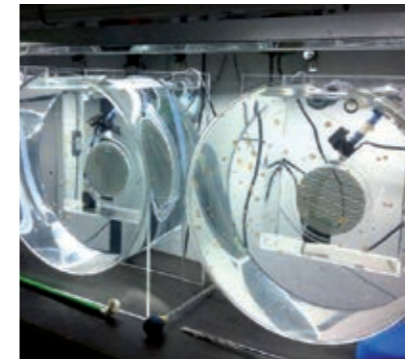

HOVERING UNDERWATER

JELLYFISH SWIRL TANKS AND BREEDING SWIRL TANKS.

Spell-binding spectacle in the Schuran jellyfish show swirl tank at the jellyfish breeding centre in Rostock.

Jellyfish are among the most fascinating living organisms in the underwater world. In close cooperation with the Berlin Zoo Aquarium, Schuran has developed highly interesting solutions to simplify and optimize options for keeping jellyfish.

The special Schuran jellyfish swirl tanks meet the complex habitat requirements of the jellyfish and provide you with a low-maintenance, simple way to keep them. Smaller swirl tanks are ideal for the temporary holding of these demanding underwater creatures.

The large show swirl tanks with diameters up to 140 cm and depths up to 50 cm are designed for long-term holding. The special features of the show swirl tanks are the variable inflow option and in particular the set-ups included with the tanks. These allow you to meet the specific needs of different kinds of jellyfish.

SALES-BOOSTING ATMOSPHERE

EMOTION FOR RETAILERS, HOTELS AND RESTAURANTS.

An investment that pays off very quickly. The fantastic atmosphere in your business premises thanks to precisely fitted aquarium designs from Schuran creates an unrivalled sense of well-being and a unique shopping experience. No matter whether it is guests in a hotel lobby or customers in a restaurant or retail store:

People who feel comfortable are positive, stay longer and are more likely to buy.

You will see this reflected in your sales figures and the overall atmosphere at your premises. With custom-built, exclusively stocked basins from Schuran your business is bound to benefit.

DESIGN AND CONSTRUCTION

Working in close consultation with you, Schuran develops and designs aquariums to meet all requirements. Each basin has its own particular challenges. Each assignment is unique. We don't do aquariums „off the peg“.

It all starts with the idea. The first drafts already show you which attractive solutions are possible. Once you have approved the draft, we really get to work on the fine-tuning and construction of your basin. Every bend, every edge, every bond seam is planned with the utmost care.

ASSEMBLY, THEN STOCKING.

The entire Schuran team of experts, from A for architects through C for coral breeders to Z for zoologists, look forward to tackling your tasks.

Once all the components for your aquarium have been made precisely to measure, test assembly has been carried out at our production facility and the final, sensitive quality check has been successfully completed, we bring you your basin.

Assembly and installation of the aquariums is done with great care and precision by our own specialists. When everything fits into place, all the surfaces have received a final polish and all the seams have been checked for water-tightness, the basin is filled with seawater or fresh water, followed by stocking with the underwater living organisms of your choice.

A desire to travel to the world's exotic water reservations and an enthusiasm for fish breeding have made the company Schuran OHG Schuran a popular and recognized expert of exotic creatures all over Europe.

Schuran uses only coral sand sourced from specialized breeding partners and sustainable farms worldwide. In cooperation with our partners, we have made it our business to place our technical know-how of nature - and animal protection.

SOPHISTICATED ENGINEERING

CUSTOM-MADE FILTER SYSTEMS.

Protein skimmers from the AQUAFLOTOR series have been used in large aquariums for nearly 30 years, during which time they have proven themselves in a wide range of conditions and systems. Their special construction allows a long retention time for air bubbles and calm flotation, thereby effecting a high concentration of protein for skimming. All Aquafлотor models are fitted with a corrosion-resistant ozone connection.

Aquafлотor 800
Professional application

Hobby version

Chalk reactors
Professional application

Hobby version

By means of a specially developed gas-water separator including an injector, the reactors ensure the optimal utilization of carbon dioxide. One kilogram of CO₂ can dissolve up to one kilogram of coral sand.

For the past 30 years we have continuously developed our expertise in the deformation and processing of plastics. And today we are still equally happy handling smaller tasks in our local area as well as major challenges worldwide.

THE PLASTICS PROFESSIONALS

30 YEARS OF PLASTICS EXPERTISE.

FROM BROCHURE DISPENSER TO NATURAL SWIMMING POOL.

Regardless of whether you need some brochure dispensers for your business, want to have an attractive catalogue shelf made as a brochure display for your exhibition presentation or would like to have a natural swimming pool in a plastic basin installed in the garden of your luxury hotel:

The highly trained specialists at Schuran understand you. We will gladly attend to any task, no matter how small or how complex. With our experience and know-how we will be build exactly what you had in mind.

Welcome to Schuran.
